(54) PHOTOELECTRIC CONVERSION ELEMENT AND PHOTOCELL

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a dye sensitized photoelectric conversion element superior in output voltage by easily adjusting the energy level of a semiconductor, having high conversion efficiency, and easy to manufacture.

SOLUTION: In this photoelectric conversion element having a semiconductor fine grain layer sensitized by a dye, and a charge carrier layer, the semiconductor fine grain layer includes at least one kind of second metallic element of ≥ 0.01 mol% and < 50 mol% to a first metallic element as the main element, with the first metallic element. A photocell uses this photoelectric conversion element.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
